Barcelona

About me

I'm a Frontend developer with 3 years of experience, specialized in React centric Javascript web applications (ReactJS) with Redux.

I use the latest CSS/SASS for styling and custom design (I also work with third party CSS libraries if required).

I like to find new challenges and work in a team to solve them!

Skills:

Developer:

HTML5 / CSS3
Javascript (ReactJS)
Redux
API REST

Languages:

Spanish: Native
English: Intermediate

Education

I.S.F.D Nº 84

Professor in Physical Education

- Graduated

Work Experience:

Front end developer Freelance

- 2019 - 2021

I worked as Frontend making movie websites for a client. He provided me with a model in AdobeXD and I created the application with Reactjs and the styling that was needed.

I did this on demand for almost 2 years.

Example: <https://www.repelis.army/>

Front end developer

Axioma IT Solutions

- 2021 - Actually (until March)

I worked as the main and only Frontend Developer in a project where we had to migrate an app from Angular to Reactjs for a client that was dedicated to offer logistics machinery.

This app was used to keep track of the workflow, both for employees and for their bosses.

About the app: Made with ReacJS with Hooks and Redux, Material Ui as main CSS framework, using API Rest, PDF downloads, signature generation, private routes.
